

## Session-12: Date and Time Handling Concepts –

### Program:

```
import java.time.LocalDate;

class Solution {

    public int dayOfYear(String date) {

        LocalDate d = LocalDate.parse(date);

        return d.getDayOfYear();

    }

}
```

### Output:

The screenshot displays the LeetCode submission interface for the problem "Day of the Year". The solution is written in Java and is marked as "Accepted".

**Problem Details:**

- Problem: Day of the Year
- Status: Accepted (10958 / 10958 testcases passed)
- Submitted by: Praveen\_1437
- Submitted at: Sep 17, 2026 14:16

**Performance Metrics:**

- Runtime: 36 ms (Beats 8.47%)
- Memory: 48.92 MB (Beats 6.17%)

**Code Editor:**

```
1 import java.time.LocalDate;
2 class Solution {
3     public int dayOfYear(String date) {
4         LocalDate d = LocalDate.parse(date);
5         return d.getDayOfYear();
6     }
7 }
```

**Testcase Results:**

- Accepted (Runtime: 5 ms)
- Case 1: Input: "2019-01-09", Output: 9, Expected: 9
- Case 2: (Status: Checked)

## 12b. Day of the Week –

### Program:

```
import java.time.LocalDate;

import java.time.DayOfWeek;

class Solution {

    public String dayOfTheWeek(int day, int month, int year) {

        LocalDate date = LocalDate.of(year, month, day);

        DayOfWeek d = date.getDayOfWeek();

        return d.toString().charAt(0) +

            d.toString().substring(1).toLowerCase();

    }

}
```

### Output:

The screenshot displays the LeetCode submission interface for the 'Day of the Week' problem. The submission is marked as 'Accepted' with 45/45 testcases passed. The code is in Java, and the runtime is 5 ms. The input is day=31, month=8, year=2019, and the output is 'Saturday'.

**Runtime Performance:**

| Metric  | Value    | Beats  |
|---------|----------|--------|
| Runtime | 5 ms     | 15.76% |
| Memory  | 43.00 MB | 11.70% |

**Testcase Results:**

| Case   | Status   |
|--------|----------|
| Case 1 | Accepted |
| Case 2 | Accepted |
| Case 3 | Accepted |

**Input:**

```
day = 31
month = 8
year = 2019
```

**Output:**

```
"Saturday"
```

**Expected:**

```
"Saturday"
```
