

Session – 4:

4a. Running Sum of 1d Array :

Program:

```
class Solution {  
  
    public int[] runningSum(int[] nums) {  
  
        int[] result = new int[nums.length];  
  
        result[0] = nums[0];  
  
        for (int i = 1; i < nums.length; i++) {  
            result[i] = result[i - 1] + nums[i];  
        }  
  
        return result;  
    }  
}
```

Output :

The screenshot displays the LeetCode interface for the 'Running Sum of 1d Array' problem. The top navigation bar includes 'Description', 'Accepted' (100.00%), 'Editorial', 'Submissions', and 'Solutions'. The left sidebar shows 'All Submissions' and a performance graph. The main content area is divided into two panels: 'Code' and 'Test Result'.

Performance Metrics:

- Runtime: 0 ms, Beats 100.00%
- Memory: 43.60 MB, Beats 99.04%

Code Panel: Shows the Java solution code for the 'runningSum' method.

```
1 class Solution {  
2     public int[] runningSum(int[] nums) {  
3         int[] result = new int[nums.length];  
4         result[0] = nums[0];  
5         for (int i = 1; i < nums.length; i++) {  
6             result[i] = result[i - 1] + nums[i];  
7         }  
8         return result;  
9     }  
10 }  
11
```

Test Result Panel: Shows the test results for the solution.

Accepted Runtime: 0 ms

Case 1 Case 2 Case 3

Input: nums = [1,2,3,4]

Output: [1,3,6,10]

Expected: [1,3,6,10]

More challenges:

- 605. Can Place Flowers
- 2389. Longest Subsequence With Limited Sum
- 3982. Sum of Integers with Maximum Digit Range

4b. Richest Customer Wealth :

Program:

```
class Solution {  
    public int maximumWealth(int[][] accounts) {  
        int rich = 0;  
        for(int[] i : accounts){  
            int sum = 0;  
            for(int money : i){  
                sum += money;  
            }  
            rich = Math.max(rich, sum);  
        }  
        return rich;  
    }  
}
```

Output :

The screenshot displays the LeetCode interface for the 'Richest Customer Wealth' problem. The top section shows the problem description and the user's submission status: 'Accepted' with 34/34 test cases passed. The user's name is 'Praveen_1437' and the submission time is 'Sep 14, 2026 22:38'. Below this, there is a promotional banner for 'Unlock the Full LeetCode Experience'.

The 'Code' section shows the Java solution:

```
1 class Solution {  
2     public int maximumWealth(int[][] accounts) {  
3         int rich = 0;  
4         for(int[] i : accounts){  
5             int sum = 0;  
6             for(int money : i){  
7                 sum += money;  
8             }  
9             rich = Math.max(rich, sum);  
10        }  
11        return rich;  
12    }  
13 }
```

The 'Test Result' section shows the input and output for three test cases:

Testcase	Input	Output	Expected
Case 1	accounts = [[1,2,3], [3,2,1]]	6	6
Case 2			
Case 3
